

WATER-SAVING CHECKLIST

FIX LEAKS PROMPTLY

Repair leaking faucets, toilets, and pipes as soon as possible.

SPREAD LAUNDRY OUT

Space out laundry loads throughout the week.

RUN FULL LOADS ONLY

Run dishwashers and washing machines only with full loads.

INSTALL EFFICIENT FIXTURES

Use low-flow showerheads, faucets, and toilets.

TAKE SHORTER SHOWERS

Shorter showers use less water and less energy.

USE WATER-EFFICIENT APPLIANCES

Choose ENERGY STAR® appliances that use less water.

DIVERT EXCESS WATER

Direct roof drains, sump pumps, and other excess water away from the drainfield.

SMALL STEPS. BIG IMPACT.

Conserving water helps protect your septic system, saves money, and is better for the environment.
